

Slope  
Exhibit V-4

- >30%** Regions or slopes exceeding a gradient of more than 30%<sup>1</sup>. Recommended to remain as open space to reduce the potential for slope instability, and debris flows.
- 10-30%** Region where hillside design and grading guidelines should be implemented (see text).<sup>2</sup>
- <10%** Slope gradient less than 10%. No special hillside recommendations are required.

1. Slope steepness is based on regional mapping and specific sites near boundaries should be checked by the project engineer.  
 2. Refer to City Development Code regarding slopes greater than 8% for hillside development regulations.
