

## Senior Information Systems Specialist

### Supplemental Application

On a separate sheet of paper, please answer the following questions in a grammatically correct style that is clear, thorough, and concise. Using a 12 point font, one inch margins, and single spacing, devote no more than 7 sentences in answering each question.

1. How do you believe your combination of education and experience qualifies you for this position?
2. What is the most significant responsibility you have had in your career and what did it teach you?
3. Describe your experience in designing, managing, and trouble-shooting enterprise-wide network services including the following resources: Cisco switches, routers, firewalls, DNS, and protocol analyzers.
4. Describe the largest size of the network you managed, along with the model number/version of hardware and software used.
5. Describe your experience in designing, managing, and trouble-shooting enterprise-wide systems services including the following resources: servers, Windows server operating system, and Active Directory Services.
6. Describe your experience in designing, managing, and trouble-shooting Microsoft Exchange, SQL, and backup systems.
7. Describe your experience in designing, managing, and trouble-shooting enterprise-wide virtual servers including the following resources: VMware ESX, VSphere, DoubleTake, and iSCSi SANs.
8. Describe your experience in designing, managing, and trouble-shooting enterprise-wide virtual desktop services.
9. Describe your experience in designing, managing, and trouble-shooting enterprise-wide PC desktops, laptops, and printer services.
10. What is your experience developing hardware, software, and service specifications for procurement?
11. Describe your project management experience, including the most challenging project you worked on and the role(s) you played in this project.
